

New Product Release

Product introduction (1998)

**Rubber Flapper Check Valve
(Fig. 851)**

The Flex-check rubber flapper check valve from Milliken Valve Co. in Bethlehem, PA is constructed of high-strength ductile iron and has a full 1965-kPA (285 psi) pressure rating.

Designed for use in municipal and industrial applications the valve is independently certified to provide one million cycles without damage to either the flexible rubber encapsulated disc or epoxy-lined seat.

Available in sizes from 2" to 24" the Flex-check is also available rubberlined for abrasive services.

Back flush devices and proximity switches are also available.
